Why partner with TechGeekConnect?

Companies hire skills, not just degrees

Freshers often struggle with interviews, resumes and real project experience. We close that gap on your campus, so your students graduate with practical skills, a portfolio and the confidence to get hired.

AI-first curriculum

Agentic AI, AI agents, Gen AI, full stack, Kubernetes, Docker and Jenkins, taught by working professionals.

Guaranteed internships

Every student works on real-time client projects and earns a certificate.

Better placement results

Mock interviews, resume building and interview calls with hiring partners.

Training on your campus

Classroom sessions at your college, online batches, or at our Wagholi centre.

AI career seminars

Career guidance on AI and IT roles, with no extra load on your faculty.

Soft skills that get noticed

Communication, presentation and team building, built into every programme.

Our vision

Deliver innovative software solutions and empower individuals with technology skills through hands-on training.

Our mission

Shape the future workforce with industry-relevant expertise and drive digital transformation across sectors.

Pooja Gavandar
Founder and Director, TechGeekConnect Technologies

Learn | Build | Grow

What we offer students

From classroom to first job offer

Resume Writing Guidance
A recruiter-friendly resume that stands out

Interview Preparation
Crack technical and HR interviews

Job Opportunity Guidance
Current openings in the industry

Career Mentorship
Personal guidance from industry experts

Our training journey

1. Build the right skills
2. Prepare for interviews
3. Create a strong profile & portfolio
4. Explore job opportunities
5. Kickstart your career

For colleges

- On-campus and online training programmes
- Semester internships with live industry projects
- Career guidance seminars and workshops on AI careers
- Resume and mock interview drives for final years
- Interview drives with our hiring partners
- Faculty development programmes

For corporates

- Corporate and industrial training for teams
- Web, mobile, cloud and AI-powered applications
- IT strategy, consulting and digital transformation
- E-commerce and desktop software
- Trained, project-ready freshers to hire

AI-first curriculum

Learn the tech companies are hiring for now

TechGeekConnect is an AI-first training institute. Every programme is built around the skills shaping today's jobs: AI agents, Gen AI and cloud-native engineering.

TRENDING

Agentic AI & AI Agents

Build AI agents that plan, use tools and complete tasks: LLMs, prompt engineering, RAG and multi-agent workflows.

TRENDING

Forward Deployed Engineer

Take AI from prototype to production with real clients: Python, APIs, cloud, LLM integration and customer delivery.

Gen AI & Machine Learning

Machine learning, generative AI and LLM-powered applications with Python.

DevOps & Cloud-Native

Docker, Kubernetes, Jenkins CI/CD pipelines and AWS deployment.

Tools you'll use: Python, LLMs, AI Agents, RAG, Docker, Kubernetes, Jenkins, AWS, Git, Jira

FULL STACK & CORE PROGRAMMES

Python Full Stack
Front end, back end, databases

Java Full Stack
Core Java to enterprise apps

MERN / MEAN Stack
JavaScript web development

Data Science
Analysis and visualisation

Software Testing
Manual and automation

API Development
Design and build APIs

C and C++
Programming foundations

Web Design
Modern, responsive websites

Project Management
Jira, Confluence, Git, Agile

Skill up, stand out!

100% internship, 100% placement support, mock interviews, resume and digital profile building in every programme.

For companies & recruiters

Tell us who you need. We'll bring trained candidates.

No hiring guesswork and no pile of 500 unfiltered resumes. You get a short list of students who have already built projects with your tech stack.

COLLEGES
Talent pool
- ✓ 15+ engineering & polytechnic campuses
- ✓ B.E. / B.Tech, Diploma, B.Sc. students
- ✓ Final-year and pre-final batches

→

TECHGEEKCONNECT
Screen · Upskill · Prepare
- ✓ Training mapped to your tech stack
- ✓ Live client projects + certificate
- ✓ Mock interviews, resume & portfolio

→

COMPANIES
Right candidates
- ✓ Shortlisted, project-ready freshers
- ✓ Campus or virtual interview drives
- ✓ Career switchers with experience

HOW HIRING WITH US WORKS

1 — Share your need
Role, skills, openings and joining date.

2 — We find talent
Shortlist from partner colleges and our batches.

3 — We upskill
A focused bootcamp on the gaps your role needs.

4 — Interviews arranged
On campus, at our Wagholi centre or online.

5 — Hire & onboard
We stay in touch through the first months.

What you get

- ✓ Trained, project-ready freshers to hire
- ✓ Custom upskilling in the tools your team uses, before day one
- ✓ Campus hiring drives across our partner colleges
- ✓ Experienced professionals switching into AI, cloud and DevOps roles
- ✓ Corporate and industrial training for your existing teams
- ✓ Web, mobile, cloud and AI-powered application development
